

Bradley VP150S 150 L/min Vacuum pump with Electronic Solenoid Valve

The BRADLEY VP150S is a high-performance vacuum pump engineered for HVAC/R professionals who demand excellent reliability and vacuum. It's unique design and high quality materials enable performance vacuum ratings on demand.

Delivering a impressive 150 litres per minute, it features an integrated electronic solenoid valve to prevent oil backflow and maintains vacuum integrity if the power is disconnected for any reason.

Designed for system evacuation, leak testing, and refrigerant recovery, the Bradley VP150S vacuum pump combines robust design with durable construction—making it a trusted choice for air conditioning and refrigeration professionals.

FEATURES

- 150 L/min of free air displacement
- 15 micron ultimate vacuum
- 1/4" and 3/8" inlet valves
- Electronic solenoid valve
- Large oil drain and sight glass
- Gas ballast
- 5 Meter Hardwired power cable
- Certified for use with A1 (R134A/ R410A) and A2L (R32 and R1234yf) refrigerants
- 24 month warranty

INCLUDES

1 x Vacuum pump fitted with 5-meter cable and solenoid valve, 1x English operating instructions, oil, and 24-month warranty.
